! STORAGE AND USE INSTRUCTIONS FOR LIFTING BAGS !

- Place the lifting bag under load to be lifted
- When using the bag do not pull the coupling to avoid the feed's traction
- Respect the 8 bar max. pressure
- Be sure that the surface in direct contact with the lifting bag does not present any points that could cause the rupture
- Do not inflate a lifting bag un-loaded
- Store the lifting bag sheltered from light
- Please refer to the detailed instructions
